

Christopher and Crystal Reigan

My first encounter with the ever popular physics, Christopher and Crystal was during a radio broadcast from JC55 in Kamloops, B.C. approximately four years ago, (1999). , I was extremely impressed. Not only do they have a diverse level of intelligence and worldly knowledge but they also have extremely impressive physic intuitions. The radio callers did not have mention any personal "lead in" type of information from which Christopher and Crystal could expound upon in a general sense. Their readings are precise and specifically addressed to the individual.

I was so entreated , I called Christopher for a personal reading.

I have been going through extreme personal emotional and financial difficulties through the past five years and as I get close to the point of desperation, I reach out for his words of wisdom. His physic incites and willingness to share and help others is truly honorable.

When my direction was floundering, he advised me on better opportunities and gave me the courage to pursue them. Christopher has forewarned me of dangerous situations, thus allowing me to better protect myself emotionally and physically. I have benefited from this specific advice. He has informed me of the behavior and character types of certain people in or affecting my life and also advised me as to the reasons for their behaviors. This has allowed me to have a much better understanding, patience and hope for the future.

From time to time, I have reviewed tapes of previous readings and have been astounded by the accuracy of his projections.

This has encouraged me to share Christopher's physic accuracy with others and as to date, two family members and two friends have also found his readings to be very insightful and beneficial to them.

Not only am I appreciative of the personal readings, I have thoroughly enjoyed listening to Christopher and Crystal's radio broadcasts ever since.

Sincerely
Heather Devick
